

Custom Peptide Synthesis Service

APIs - Active Pharmaceutical Ingredients .

Desmopressin - Vasopressor - CAS-Number: 16679-58-6

Genosphere Biotechnologies offers the purchase and *de novo* synthesis of Active Pharmaceutical Ingredients.

Our partner Shenzhen JYMedtech is a manufacturer of peptides used as R & D peptides and active pharmaceutical ingredients (APIs). We provide a broad range of ready to order APIs. Generic APIs with DMF or without used in R & D in the field of antibiotics, cancer, diabetes, obesity and fertility.

We have the capacity to produce generic peptide APIs in quantities of starting up with several kilograms a year. Our GMP manufacturing facilities are in compliance with FDA and local authorities.

We are strong partners for peptides and are well prepared to fully support you with the required regulatory documentation. We will provide you with MoA and DMF if higher amounts of API will be requested on a regularly base.

APIs -Active pharmaceutical ingredients

We synthesize R & D antibiotic molecules like : Telavancin

Telavancin (C₈₀H₁₀₆Cl₂N₁₁O₂₇P, Mr = 1755.6 g/mol) ATC J01XA03) is bactericide on grampositive bacterias including *Staphylococcus aureus*. Its effects are based on the inhibition of bacterial cell wall synthesis by binding onto Peptidoglycan precursors. In contrast to Vancomycin, Telavancin is disturbing the cell membrane function of the bacterias additionally.

Telavancin - Antibiotic - CAS-Number: 372151-71-8

	CAS-Number	Price	Function
Telavancin	372151-71-8	Please inquire	Antibiotic

For research use only. Products currently covered by valid US Patents or any other patents are offered for R&D use in accordance with 35 USC 271(e)+A13(1). Any patent infringement and resulting liability is solely at buyer risk.

Our local account manager will be ready to discuss your requirements confidentially.
